How to use this vault

Every prompt below is a ready-to-use template. Copy it into ChatGPT, Claude, or any AI assistant and replace the text in [brackets] with your own details.

Tips for the best results:

- Be specific: the more context you give in the [brackets], the better the output.
- Iterate: if the first answer isn't perfect, ask the AI to 'make it shorter/bolder/more casual'.
- Combine: chain prompts together (e.g. research a niche, then write the listing).
- Save your favorites: keep the outputs that work as your own reusable swipe file.

These prompts are built to save you hours every week on marketing, listings, customer service, ads, research, admin and content. Let's get to work.
